

General Care

We suggest gently vacuuming with a special upholstery attachment or using a soft hand brush once a week. This will remove any dust or fuzz that has formed on the surface of the fabric and prevent displacement of the pile over time. When vacuuming or brushing, make sure you are doing so in the direction of the pile.

Spillages

If you spill something on your velvet sofa or cushion, DO NOT attempt to clean it with water or rub it with a cloth. Liquids can stain velvet easily and rubbing may force the spill deeper into the fibres. Simply blot the surface with a dry, highly absorbent cloth, taking care to avoid rubbing or putting pressure on the fabric.

Maintaining Sheen

A handheld clothes steamer or one with a wand works great to lift the nap or pile of the velvet. Use a low heat setting to avoid damaging (melting) the fibers. Hold the steam head several inches from the fabric and move in a grid over the problem areas. Always keep the steam moving. Use your hand to gently brush the nap in the opposite direction to help release the wrinkles.
