get to know Ukraine through people, through their work, and they will not leave you indifferent.

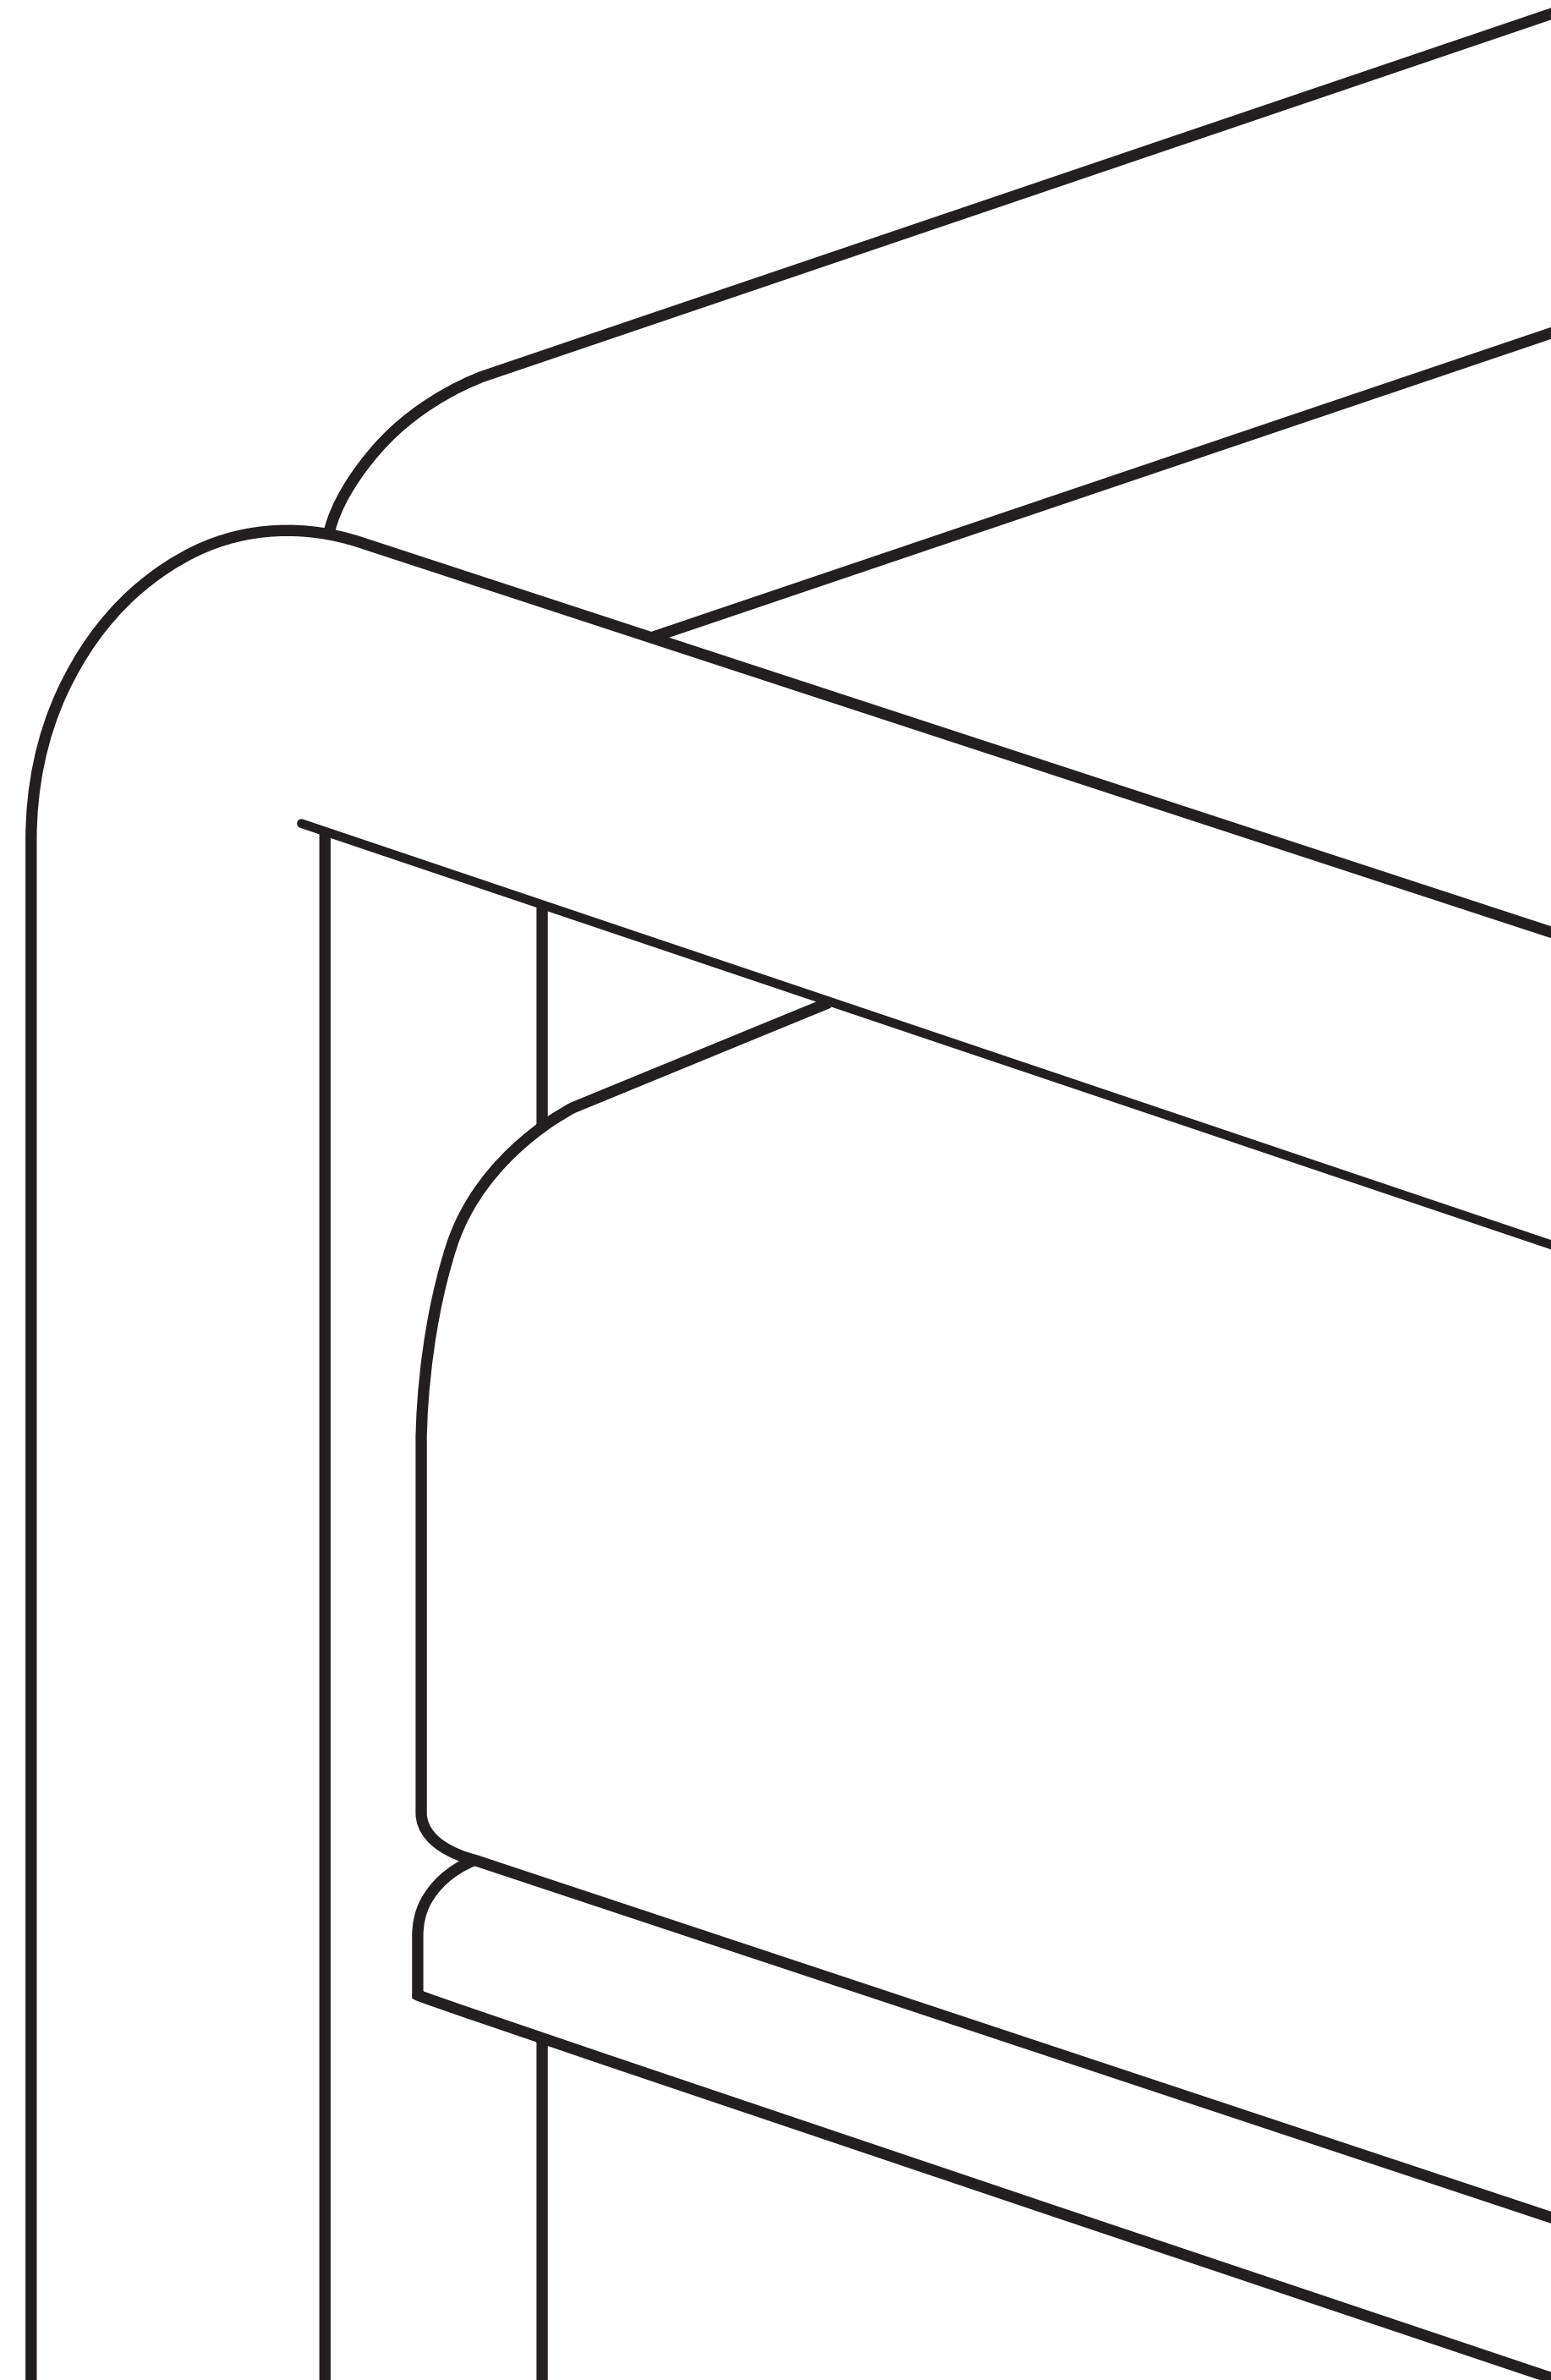

PROWLING LOUNGE CHAIR

We created it thinking about how to create an interesting new silhouette with simple geometric shapes, and give it a special character.

As a result, we settled on a low and wide volume, completely covered with a soft velvet fabric.

Sufficiently massive seat enclosed in a “frame” of three curved tubes that act as legs, back and armrests. The details of this produkt are fixed in such a way as to create the feeling that they barely touch each other.

LIQUID TABLE

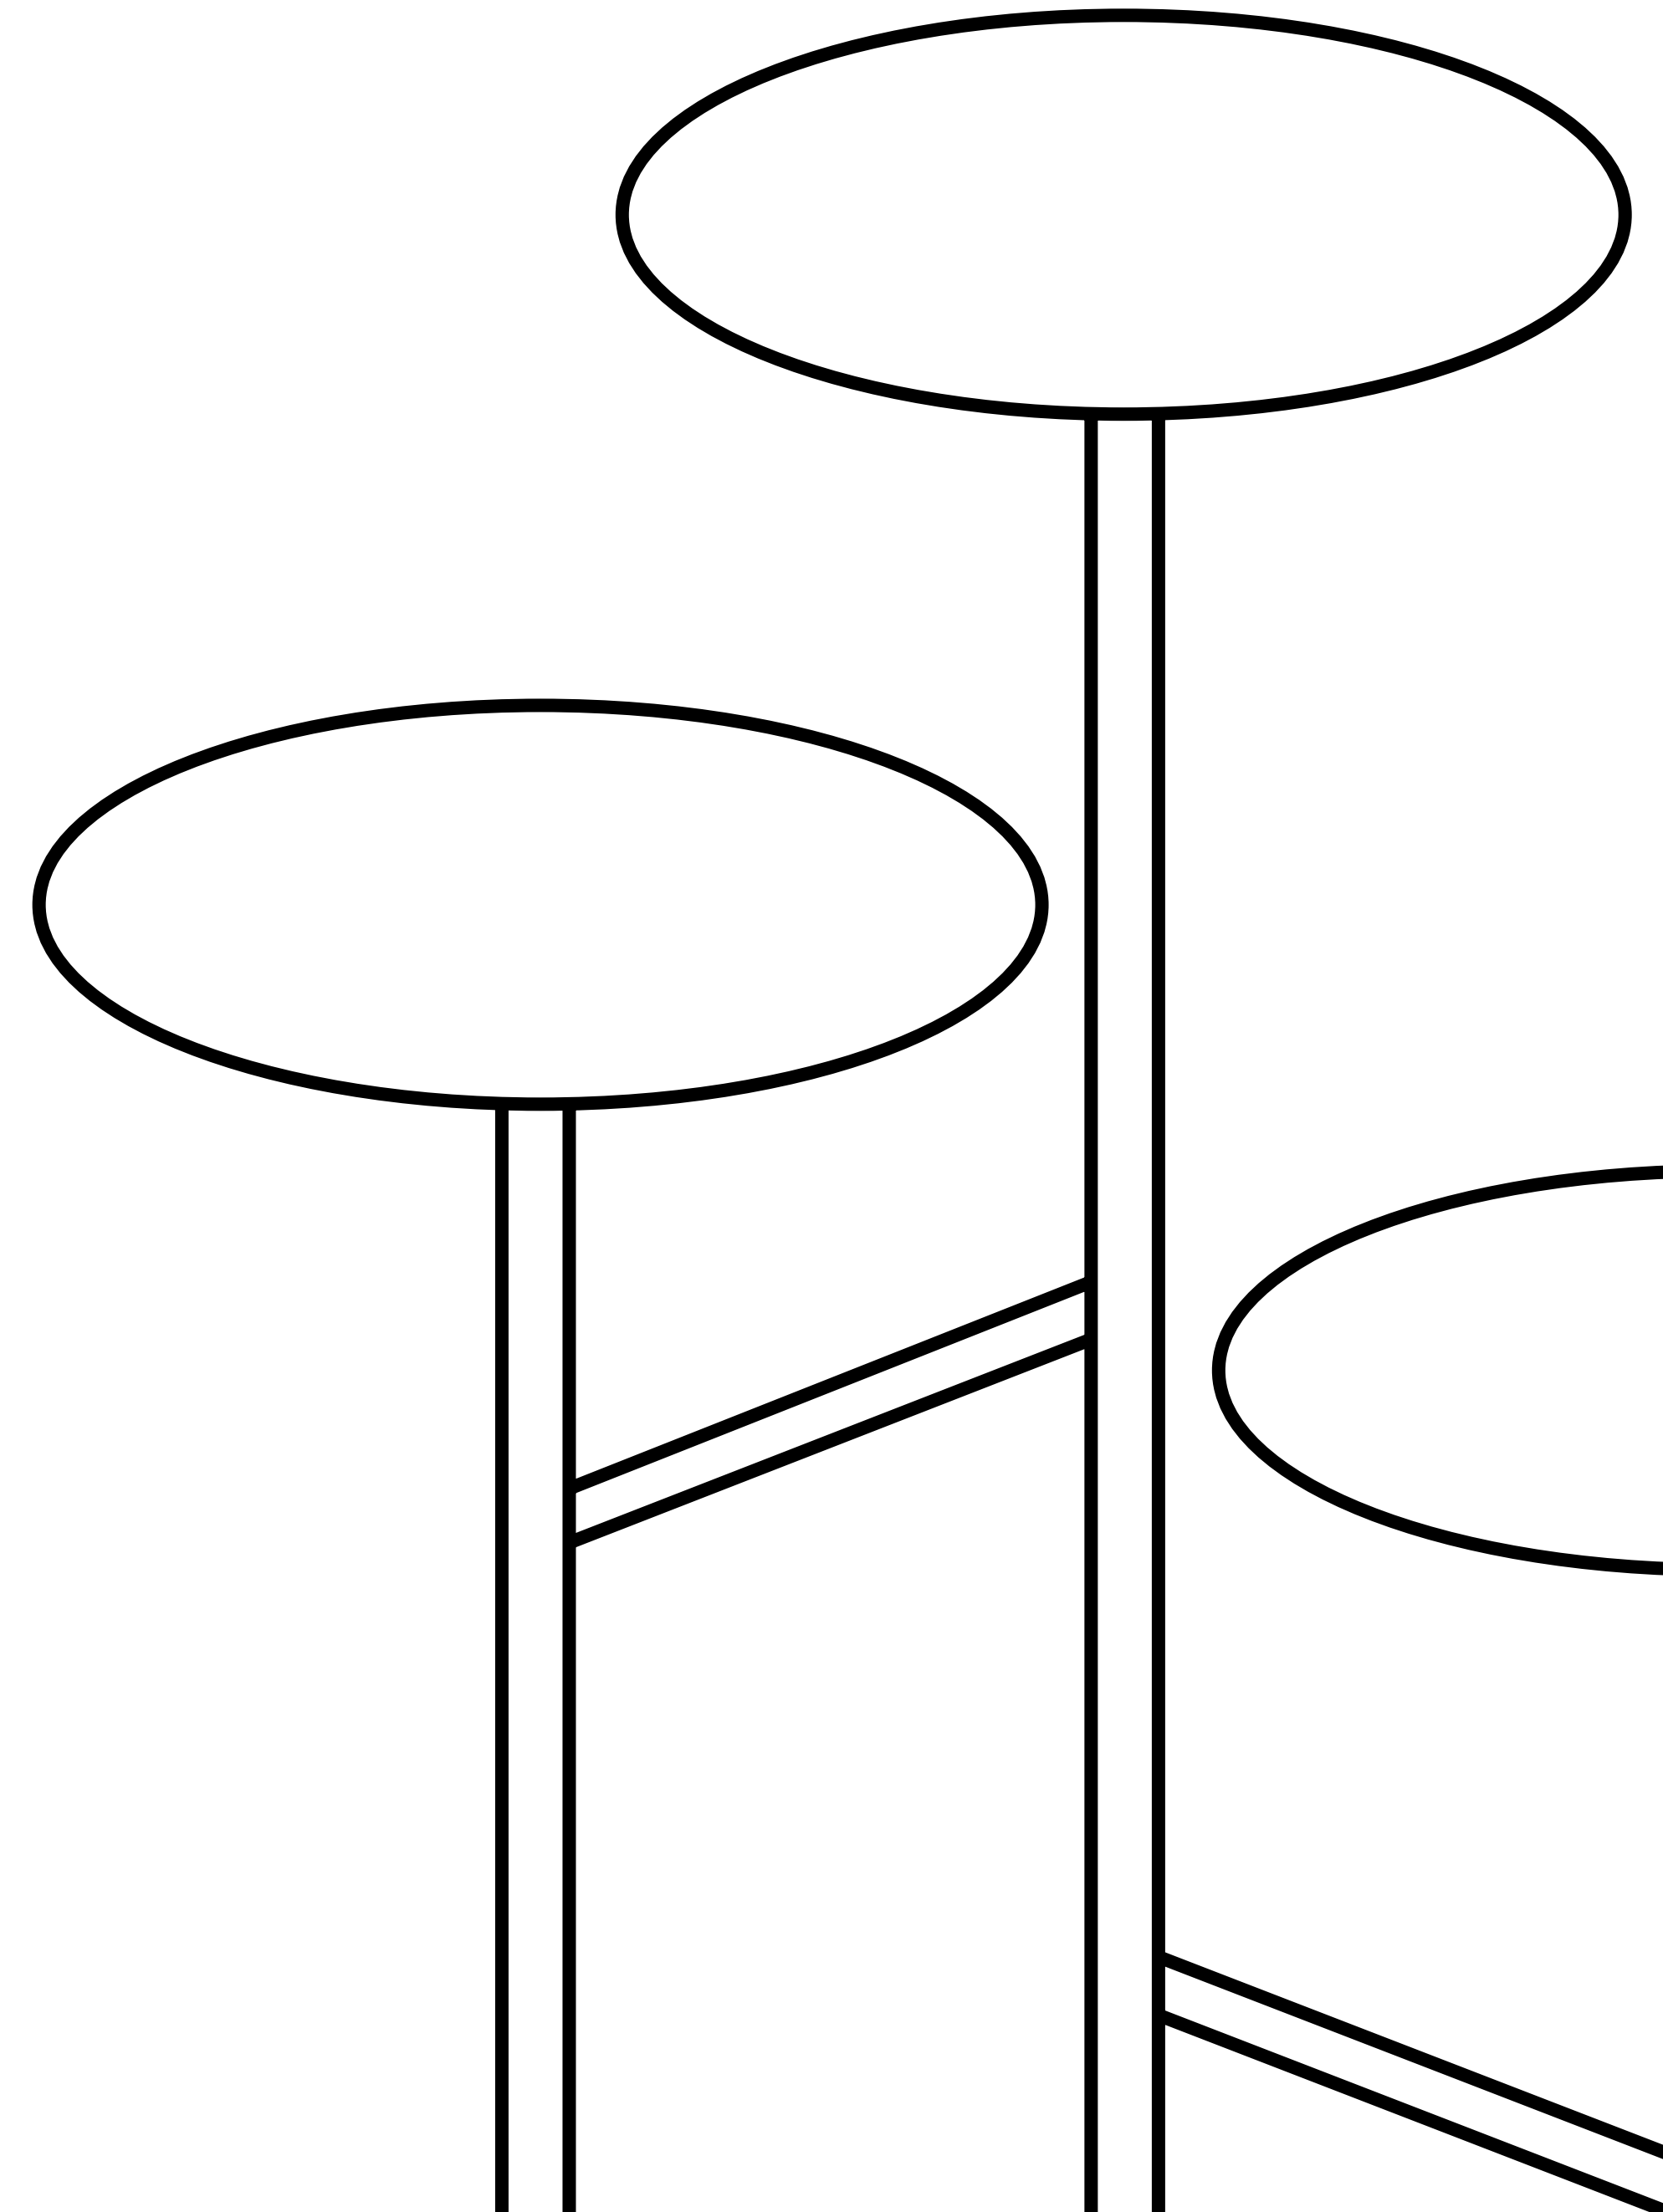

Working on the LIQUID TABLE, we were inspired by the versatility of the metal, its visual qualities, its sound, and physical properties. This gave us the idea to create an object that dissolves in space, sparkling in the rays of light like a water surface.

Here, the modern and minimalist form is combined with the old technique of hand-chasing.

We applied chasing not only on the tabletop, but also on the legs, to create a holistic silhouette, and make the entire surface equally radiant.

We also made the tabletops removable for easy transportation.
